THE COMPETITIVE EDGE -- FILTER MATE® HAS IT ALL.

- Side loaded housing accepts more filter combinations. Up to five stages of progressive density filtration available for maximum efficiency. Filter choices include panel prefilters, mist collectors, spark arrestors, extended surface pleats, V-bags, HEPAS, partial bypass or solid bed panels of activated charcoal.
- A wide variety of motor and blower sizes are available to better meet user's requirements.
- The ability for you to select a filter-motor-blower combination provides for unlimited versatility.
- Cabinet designed to end load or side load for more applications.
- Our technical and engineering support helps you select the correct unit for your application.
